

Customer Feedback Report	Ref: CFR-001	
Method:	From Outside the Roof	
Products:	Insulfix Track – Single and Half	
Code:	R130S & R130H	
Rafter size:	150mm Rafter depth	

Type of Installation

PIR insulation fitted from Outside the Roof.

Overview of job

A triple garage with room-over required insulation at rafter level. 3 windows in the roof. This would usually have been insulated by installing the insulation boards from inside the roof. As Insulfix Track enables the boards to be easily fitted from outside the roof, this option was chosen with only one fitter, rather than two, allocated to the job.

Installer

Carpenter – not used Insulfix Track before.

Time Estimate

16 hours total using 2 fitters

Actual time required

4 hours one fitter

Time saved

12 hours

Estimated insulation boards

25

Actual insulation boards used

21

Boards saved

4

Estimated scrap

13.5m²

Actual Scrap

2m²

Scrap reduction

11.5 m²

Feedback from site

What did you like about it particularly?

“Just the ease of installation and speed but the main thing was the finish as it is so clean and uniform it just looks absolutely neat and it is rock solid as well I don’t think that there will ever be a return visit from the chippy to put stuff in that has been knocked out. Really happy with it.”

“There was barely any waste and we used less sheets than we thought”

Anything that you didn’t like?

“The only criticism but, it’s not really a criticism, is because of the speed of the installation I can guarantee that the chippy’s will be like ‘I want two ready at a time’.”

Please Note

This is just one job and we realise that installations can vary in many ways so of course we cannot guarantee that everyone will enjoy the same savings in time and scrap. However, we are confident that others using Insulfix Track will enjoy savings in both time and insulation waste and would love to hear your feedback.

If you would like get in touch please email us at info@insulfix.co.uk with some details and pictures if you have them and you may feature in our next Customer Feedback Report.
